The day started as a bright spring day with the temperature more like that for summer but the wind didn't pay its part until much later in the day. There were periods in some early races were the race was to see who could drift the fastest towards the finishing line.
Two new comers to these days were Ian Thompson and Peter Niven.
Ian found there was quite a difference to sailing his 10r for the first time in competition to the One Metre he usually sails.
He was always
there with the other 10s and should be higher in the results figures when he has gained more experience with his new boat Peter sailed his "see through" own RM hull design and gave Clive at tin a run for his money. This was the first time that Peter has sailed in strict competition for some time and enjoyed the day.
Les Brown arrived with his new 10 and he and Kevin Skues fought it out all day as can be seen by the results. Les gained the honors for the combined racing but lost to Kevin on the count back in the separate scoring for the 10s.
Bob Newcombe as always was there to push the other 10s along whilst the James boys are a little off the pace with their older boats but were always there getting up with the leaders at times to s
Mary James, Val Black and Clive Ball kept the inner man of the skippers happy beating off their hunger pains with a lunch and some home made cooking.
Another day passed pleasantly with skippers looking forward to another
sail day on the *21st October 2007 *
